

SEMI-AUTOMATIC *Twist Tie Machine*

Model No. TD-E

Increase production. Up to 40 ties/minute; 5X faster vs. hand
Economical. Each tie costs less than a penny!

Increase production with a unit that automatically twist ties your product. This semi-automatic machine delivers up to 40 tied bags or bundles per minute. Applications are endless with use for bakery products, snack foods, dairy products, bulk packaging, paper products, electronics, wires & cables, medical, and hardware.

TD-E is portable and easy to use. Machine is durable with an all metal frame.

Easy to operate. Simply insert the bag or bundle at the front slot to trigger the tying mechanism to get a consistent twist tie around your package
