

# Bag Sealer Tape Dispensers & Tape

SL-605K (3/8")

SL-808K (5/8")

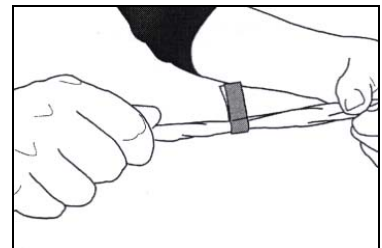

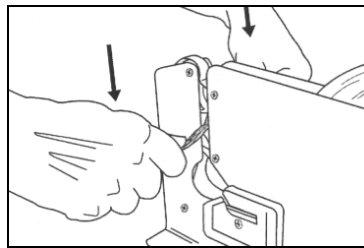

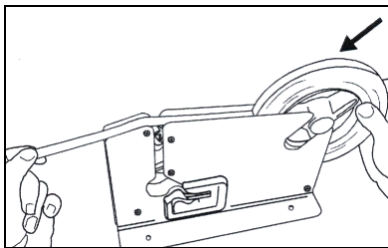

SL-606STK  
(Stainless Steel)

- **Cost-effective**
- **Tamper-proof**
- **Easy to use**
- **Efficient**
- **Durable**

## ***Tightly seal poly bags in one quick motion***

*Using these dispensers is a simple, economical way to close poly bags with vinyl packaging tape. They are capable of sealing 2,000 bags per hour and use only 2" of tapes per seal.*

*Dispensers are all steel constructed with pre-drilled holes in the base for mounting on a work surface. Sealers include a bag cutter to cut off excess poly bags. Dispensers require no assembly or maintenance. Standard sealers have a 3/8" wide throat, and heavy duty sealers have a 5/8" throat. Simply place PVC tape on the 3" core wheel and it is ready for use.*

**Easy to use:** *Just twist the mouth of the poly bag and slide through the slot (throat) with a downward motion. The tape wraps around the bag neck instantly and the tape is trimmed automatically. The excess plastic bag can be cut off with a continuous downward motion passing through the trimmer.*

## ***PVC tape***

PVC – BLK  
PVC – BLU  
PVC – GRN  
PVC – ORA  
PVC – RED  
PVC – TAN  
PVC – WHI  
PVC – YLW

*3/8" x 180 yards (540 feet) polyvinyl pressure sensitive (PVC) tape with a 3" core wheel is used. The PVC tape is available in eight vivid colors: black, red, blue, yellow, orange, white, green, and tan. A special assortment pack of 7 colors is available for 7 days of the week coding.*
